

# NIGHTSEARCHER LAMPS

The Nightsearcher Lamping range is designed for the professional lamping market.  
 All the 12 Volt Nightsearcher range have metal reflectors for extended life.  
 No sealed beams units are used to avoid future embarrassment with replacement bulbs.  
 All parts are readily available for replacement at reasonable costs.

## Nightsearcher 750, Ranger Lamps and Ranger Gunlight.

Incorporate a 110mm polished metal reflector. The pin spot lens is protected by a 20mm cowling which also reduces peripheral light. A 50 Watt Xenon bulb is fitted as standard and produces approx 1 Million Candle Power. A 100 Watt Xenon bulb is an optional extra. A secondary 10 Watt Halogen bulb is incorporated on all but the Single bulb Ranger. With the 50 Xenon bulb the lamps draw 4amp which will give approx 1.5 continuous hours of light from 6amp battery.

**NIGHTSEARCHER 750**  
 Double bulb Ranger  
 Display packed. Inc. metal  
 power pack, mains charger  
 and car lead.
